

Please deliver to the person responsible for health and safety

UV LIGHT HEALTH AND SAFETY BULLETIN

New Control of Artificial Optical Radiation at Work Regulations 2010 will bring into law in Great Britain the European Physical Agents (Artificial Optical Radiation 2006/25/EC) Directive ...

... this specifies the minimum health and safety requirements for protection of workers from risks arising from exposure to UV light.

The new regulations incorporating statutory limits for occupational exposure to UV light will be in force from **27th April 2010** ...

... MAKE SURE YOUR COMPANY COMPLIES!

We are offering the following training courses in order to provide information to help employers meet their obligations for the safe use of UV light in the workplace under the new regulations.

Health and Safety Training Course

Safety First with UV Light

A one day course aimed at Health and Safety professionals and those responsible for ensuring the safe use of UV light in the workplace. The course covers risk assessment and control of personal exposure to UV light in the workplace, in compliance with new EU rules defined by the Optical Radiation Directive 2006/25/EC ...

... *more details overleaf.*

We can also conduct this course on your site - details on request.

Operator Training Course

Safety First with UV Light

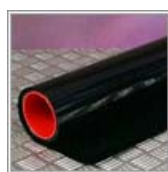

A half day course designed to provide information to help operators safely use UV light equipment for their particular application and gain confidence and acceptance from the workforce.

Courses are application specific and conducted on your site - details on request.

Other UV Health and Safety Products
